Address: Penang, Malaysia.

Professional Summary

Computer Science undergraduate specializing in Artificial Intelligence with hands-on experience in IoT systems, Android app development using Kotlin, and full-stack web apps with Django. Developed an Inventory Management System for Airbnb hosts as a final year project. Seeking a June 2025 internship to apply my skills in real-world software development and contribute to scalable tech solutions.

Technical Skills

Programming: Java, Kotlin, Python

Web Development: HTML, CSS, Django, JavaScript

IoT Tools: Arduino, MQTT

Languages: English (Advanced), Bahasa Melayu (Advanced), Tamil (Advanced)

Projects

Inventory Management System for Airbnb Hosts

1. Built a Django-based web app to automate inventory tracking and restocking alerts for Airbnb units.
2. Implemented real-time dashboards using HTML, CSS, and JavaScript.
3. Improved operational efficiency by reducing manual tracking time by 50%.

Heart Rate Monitoring System – IoT

1. Developed a wearable IoT system to monitor heart rates and alert users of abnormalities in real time.
2. Integrated pulse sensors and microcontrollers with cloud-based platforms using MQTT.
3. Technologies used: Arduino, MQTT.

Calculator App – Kotlin

1. Built a user-friendly Android calculator app with advanced mathematical functionality.
2. Gained experience managing app lifecycle and state persistence in Android Studio.
3. Technologies used: Kotlin, Android Studio.

Education

UOW KDU University College, Penang – Bachelor's in Computer Science (Hons)

Jan 2022 – Present

CGPA:3.20

Relevant Coursework: Data Structures, OOP, Database Systems, Web Design, Mobile App Development

Advance Tertiary College, Penang – A-Levels

Jul 2019 – Nov 2020

Subjects: Business, Law, Psychology

Work Experience

Senior Support Associate, ALV Management

Nov 2023 to Present

1. Managed PMS IDB integration and conducted detailed data analysis.
